

# 1X36W-IP65 Fluorescent Lamp Fittings

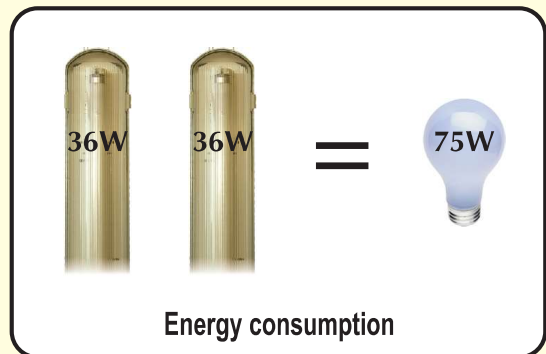

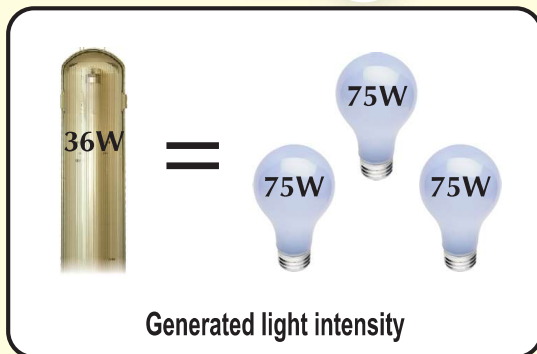

Light intensity adjusted by 1 up to 100 %

Tightness class IP-65

Adapted to standard 36 W fluorescent tube lamps

Interoperation with the DUO-Timer-010 regulator (up to 100 fittings can be connected to one regulator).

The advantages of fluorescent lamps in comparison to incandescent ones:

# DUO-TIMER-010 Programmable Time Controller

Manual or automatic mode programmable control of lighting intensity.

Two control sections: 0...10 V output for control the fluorescent lamp fittings and one ON/OFF section.

Smooth change of the illumination intensity with changing time setting (simulation of sunrises and sunsets).

Programmable and operating coherently with day (week) changes illumination cycle with the automatically introduced changes of illumination duration and its intensity, up to nine ON/OFF steps per day.

The clock operating in spite of the lack of voltage supply which counts the time of the program execution in accordance with the entered schedule.

We offer the DUO-TIMER-6A for LED bulbs and other lighting controllers.
